

Licensing Horus Reticles

Horus Vision offers a wide array of innovative reticle designs for licensing.

Most major scope manufacturers offer Horus™ reticles in their scopes, and customers ask for Horus reticles by name.

Our reticles redefine shooting with a hold over grid that enables lightning-fast adjustments. Advanced reticle features include patented wind dots, precision elevation and windage holds, Horus Rapid Range Bars, moving-target holds and more.

Our reticles appeal to marksmen, sportsmen and competitors alike, and are calibrated in mils.

View our full line of reticles at HorusVision.com.
