

HKGunLoader™

Software Version 2.05

Quick Install Guide

1st Edition
May 5, 2014

1. HKGunloader is a **FREE** utility. It may be downloaded from either the Horus Vision® website or Nielsen Kellerman website.

NOTE: *These are the only two authorized and trusted sources for this software. Please **beware** of any other websites offering this utility.*

- Horus Website (HorusVision.com):
On Horus' [HKGunLoader webpage](#).
 - Nielsen Kellerman Website (NKhome.com):
On the [Nielsen Kellerman homepage](#), look under Support for Kestrels.
2. Once you have downloaded the file GunLoader205.zip, place it somewhere you have access permission. Desktop is a good location.
 3. Unzip the GunLoader205.zip file. It will create a directory with some files in it. You may relocate this directory if you wish. Make sure you have access permission to wherever you move it.

4. Open the directory and you will find some files. Make sure that these two (2) files are present:
 - HKGunLoader.exe
 - HKGunLoader.mdb
5. Start the program by double clicking on the program file HKGunLoader.exe. It will start and create some more files.
6. Further instructions are in the User Manual HKGunLoader_User_Manual.pdf, available on Horus's [manuals webpage](#).
